

CUSTOMIZED MANUFACTURER

Low-carbon comfortism

LOKABO, a custom manufacturer specializing in the production of high-end windows and doors, is one of the earliest brands focusing on high-performance doors and windows in China. LOKABO practices "low-carbon comfort" and pursues to create more comfortable living space with lower energy consumption. Through the innovation of cutting-edge technology and independent intellectual property rights, Lokabo continues to interactively upgrade the performance and aesthetics of doors and windows, so as to make the perfect integration of aesthetics and practicality, art and system, so as to enable the building to achieve greater viewing field of vision and more transparent daylighting area. By building a high-quality global supply chain, Lokabo has always been committed to providing global users with high-performance door and window systems that fit different climates, aesthetics and scenes.

LOKABO , create a comfortable and healthy life for over 10W households worldwide.

SMART DEVICE CRAFTSMANSHIP

LOKABO doors and windows have modern intelligent production workshops, advanced production equipment and process technology, and a senior technology research and development innovation service team in the industry. Scientific overall functional zoning, introduction of imported equipment mode, realization of production intelligence and control informatization, providing the most fundamental guarantee for the excellent quality of products.

AUTHORITATIVE CERTIFICATION

German PHI passive certification

The German Passive Housing Research Institute (PHI) is globally recognized as the strictest certification system for ultra-low energy buildings, with very strict requirements and standards for calculation, design, materials, testing, etc. It is the only and most authoritative passive housing research and certification institution.

American standard certification

Obtaining American standard certification can prove that door and window products have reached the American certification level in terms of water tightness, air tightness, and wind pressure resistance. Only by obtaining this certification can one truly engage in international exports.

K82 IMPLICIT WINDOW

Frame: 6063-T6 Aluminum
Sash: Exterior Implicit Design
Coating: Tiger Metallic Powder
Insulation: Dual Flying Wings Design
Glazing: 5mm*12mm 4SG ARG*5mm*12mm 4SG ARG*5mm LowE
Hardware: Sobinco Hidden Dual Action
Seal: EPDM
Handle: Custom Anodized
Frame Corner: Self Leveling Corner Keys Assembly

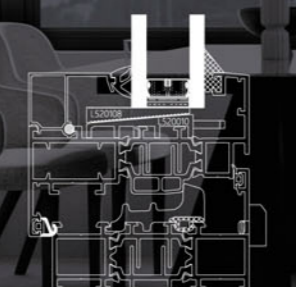

W72 OUTWARD OPENING WINDOW

Frame: 6063-T6 Aluminum
Coating: Tiger Metallic Powder
Insulation: Dual Flying Wings Design
Glazing: 5mm*14mm 4SG ARG*5mm LowE
Hardware: Adjustable Friction Hinge + Child Safety Limit
Seal: EPDM
Handle: Custom Anodized
Frame Corner: Self Leveling Corner Keys Assembly

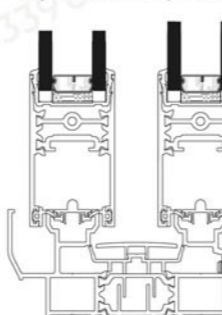

N82 DUAL ACTION WINDOW (TILT&TURN)

Frame: 6063-T6 Aluminum
Grille: Various Patterns
Coating: Tiger Metallic Powder
Insulation: Dual Flying Wings Design
Glazing: 5mm*12mm ARG*5mm*12mm ARG*5mm LowE
Warm-Edge Strip
Hardware: Sobinco Hidden Dual Action
Seal: EPDM
Handle: Custom Anodized
Frame Corner: Self Leveling Corner Keys Assembly

T82 LIFT SLIDING WINDOW

Frame: 6063-T6 Aluminum
Coating: Tiger Ultrafine Powder Matte Process
Insulation: Dual Flying Wings Design
Glazing: 5mm*20mm/4SG ARG*5mm LowE
Loading Force: 120 KGS / 264 LBS
Seal: EPDM
Handle: Custom Anodized
Frame Corner: Self Leveling Corner Keys Assembly
Operation: Lift Open, Down Close, Free Positioning

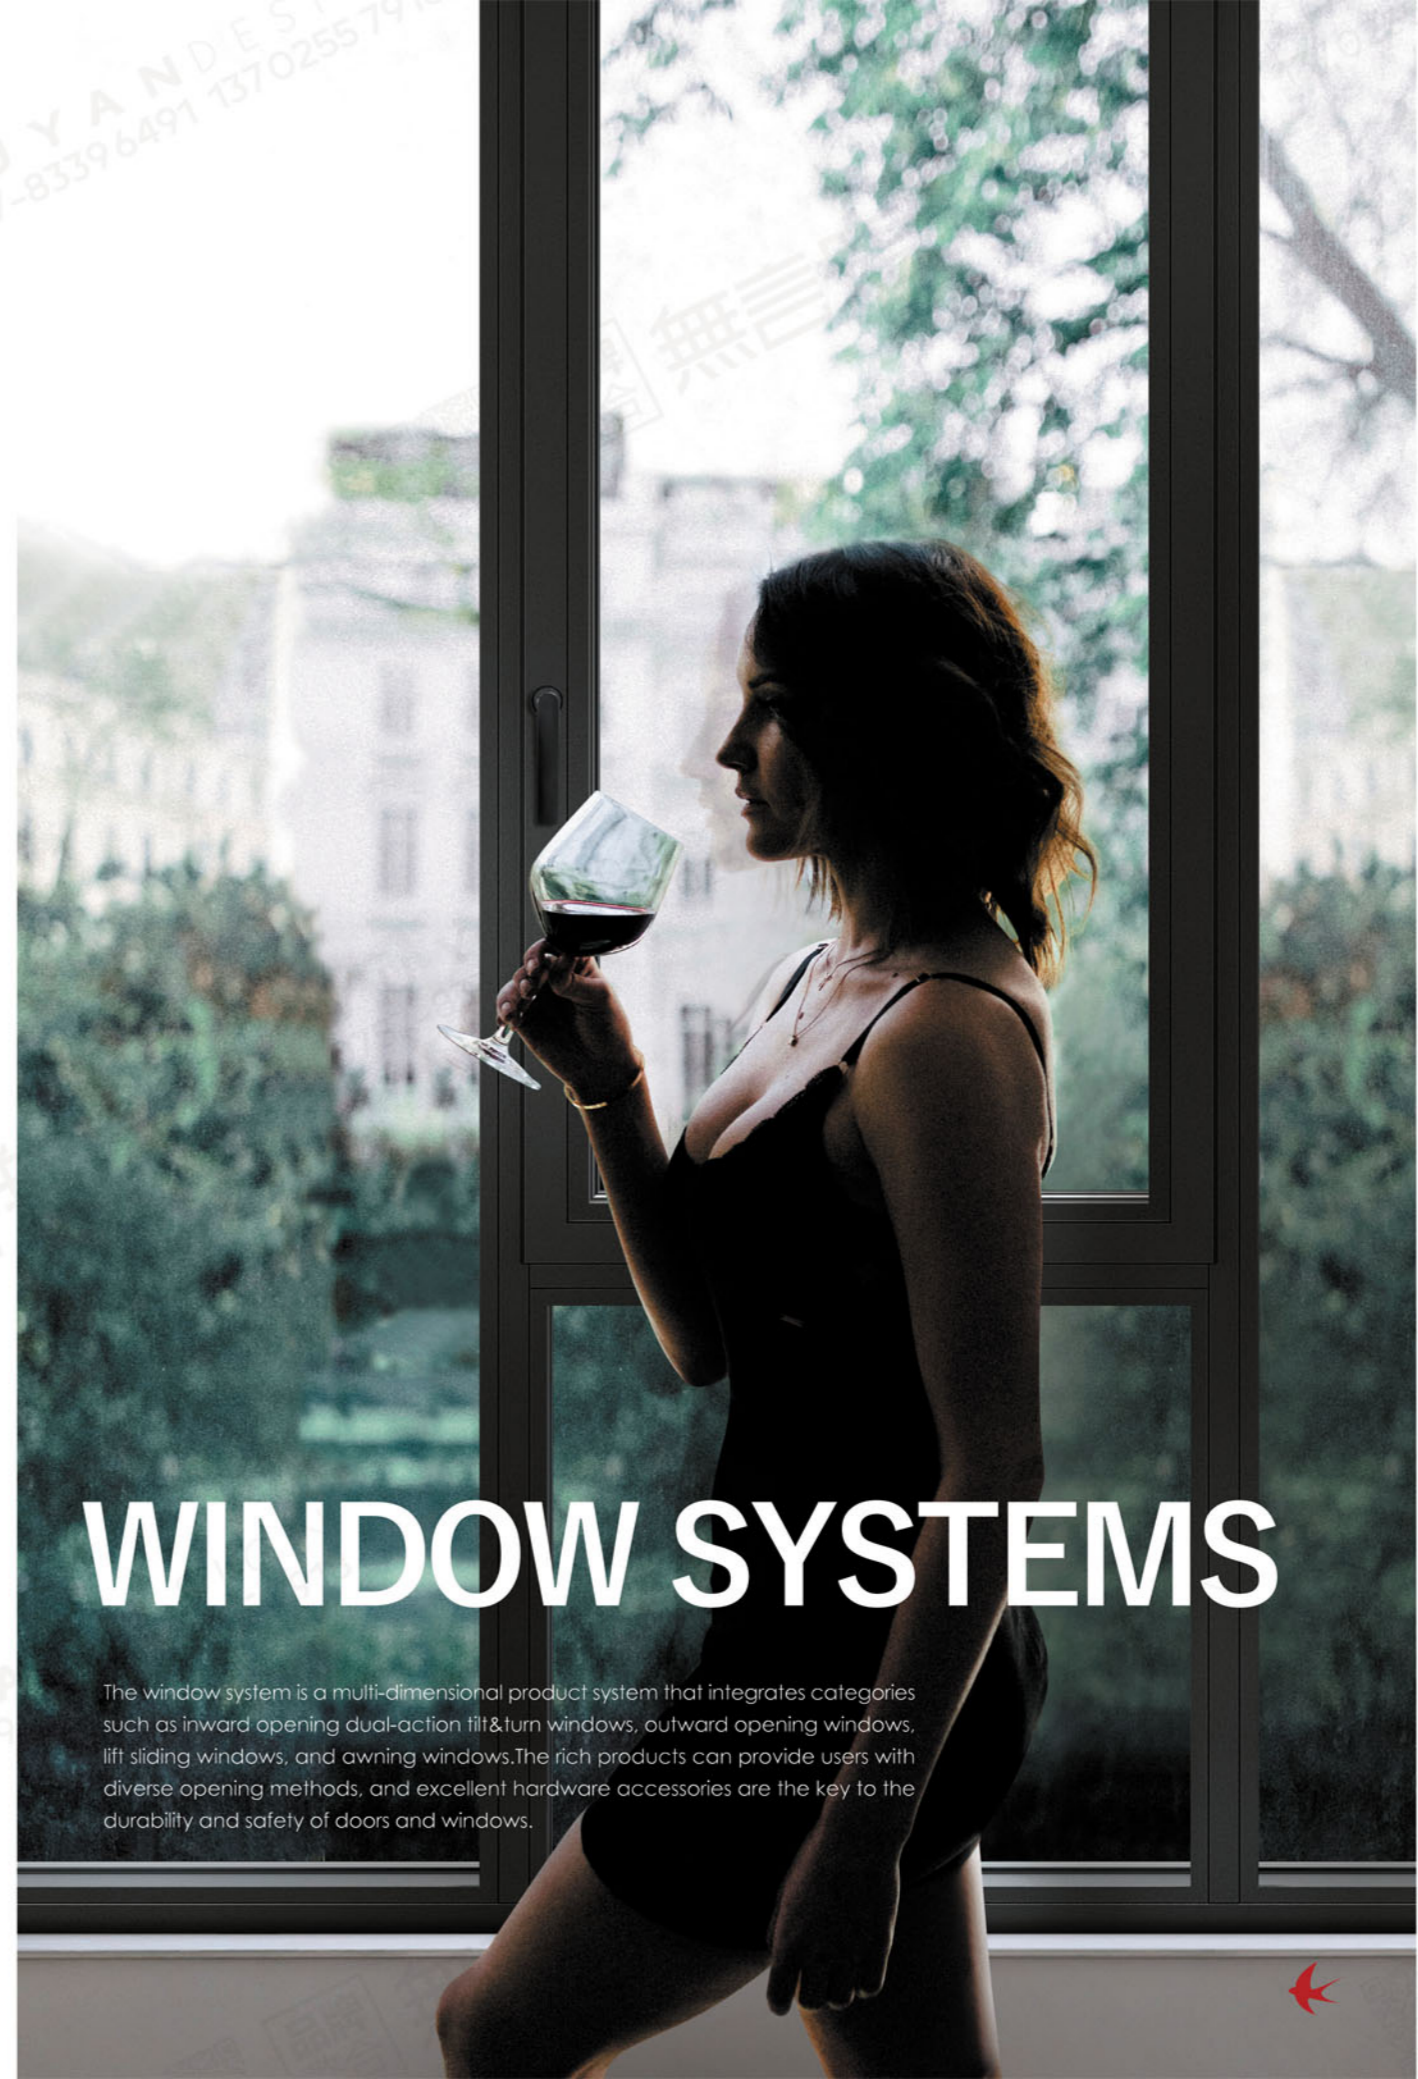

The concept of passive doors and windows aims to create a comfortable, energy-saving, and sustainable indoor environment, reduce energy consumption and carbon emissions, and improve the quality of life for residents.

GERMAN
PHI
CERTIFIED

PASSIVE WINDOW SYSTEM 110

Aluminum: High precision building aluminum profiles
Insulation strip: High performance insulation strip
Sealing strip: European standard EPDM rubber strip
Hardware: Durable concealed hardware
Glass: Double silver low-E tripple-pane two cavities TPS

WINDOW SYSTEMS

The window system is a multi-dimensional product system that integrates categories such as inward opening dual-action tilt&turn windows, outward opening windows, lift sliding windows, and awning windows. The rich products can provide users with diverse opening methods, and excellent hardware accessories are the key to the durability and safety of doors and windows.

HOME ENTRY SYSTEMS

The entrance system is a multi-dimensional product system that integrates intelligent aluminum panel doors. The entrance doors have high strength and corrosion resistance, and are also equipped with various functions such as safety locks, fire prevention, theft prevention, etc., improving the safety of residential buildings. The appearance is beautiful and generous, including a variety of popular styles and colors, providing a variety of choices.

DOOR SYSTEMS

The door system includes multiple categories of products such as sliding doors, swing doors, narrow edge panoramic doors, etc. Its material is made of high-precision architectural grade aluminum alloy, which has excellent wind shock resistance and anti-theft and fire resistance performance. Adopting precise manufacturing technology to ensure smooth opening and closing of the door and good sealing.
